de Der Spalt zwischen Einputztopf und Decke mit Acryl ausspritzen (über Deckenstärke hinaus). Decke evtl. von unten zusätzlich anpassen. Ausspritzen evtl. wiederholen. Überschüssiges dauerelastisches Acryl mit Rakel bündig abziehen.

en The gap between the mounting box and ceiling should be sprayed off with acrylic (over and above the ceiling thickness). Additionally trim the ceiling from below if necessary. Repeat the spraying off if necessary. Flush-remove any excess, permanently flexible acrylic with a squeegee.

fr Injectez un produit acrylique entre le pot d'encastrement et le plafond (au-delà de l'épaisseur du plafond). Biseautez éventuellement encore le plafond par le dessous. Répétez éventuellement l'injection. Retirez en affleurement l'excédent de produit acrylique (à élasticité permanente) à l'aide d'un racloir.

it Spruzzare prodotto acrilico nello spazio tra corpo sotto intonaco e soffitto (oltre lo spessore del soffitto). Se necessario smussare ulteriormente il soffitto dal basso. Eventualmente ripetere la spruzzatura. Usando una racla, eliminare a filo l'acrilico ad elasticità permanente.

es La ranura entre el cofre para empotrar y el techo debe rellenarse con acrílico (más allá del grosor del techo). Eventualmente, biselar el techo desde abajo. Puede ser necesario, repetir el relleno. Retirar el acrílico elástico al ras de la superficie utilizando un alisador.

nl De spleet tussen de inbouwdoos en het plafond moet worden dichtgespoten met acryl (> plafonddikte). Plafond evtl. onderaan extra afschuinen. Volspuiten zo nodig herhalen. Overtollig acryl met een rakel verwijderen zodat alles vlak is.
